PRESS RELEASE

ENGINEERING GROUP BRINGS OPEN SOURCE BUSINESS INTELLIGENCE TO THE U.S.A. SERVING THE FEDERAL GOVERNMENT AND INDUSTRY MARKETPLACE
SpagoBI suite will be presented in New York and Herndon, VA on January 26th and 28th, 2015.

Rome (Italy), January 26th, 2015 – Organized by Engineering Group in collaboration with The Triana Group, Inc. **SpagoBI Demo Day & Workshop** opens **today in New York**. A community of users, application developers and integrators for corporations and the government will explore the only enterprise-grade, entirely open source suite for Business Intelligence and Big Data analytics. This presentation and demonstration will also take place at the Center for Innovative Technology in **Herndon, VA on January 28th**, addressing both technology and business requirements.

The agenda includes **presentations, hands-on simulations, discussions and networking sessions**. It will lead participants through an overview of Engineering Group's approach to open source software, as well as of SpagoBI's key values, analytical capabilities, support services, business cases and roadmap for the future.

Thanks to these events, Engineering Group - Italy's largest operator in the IT services market and global editor of open source solutions - will affirm its already **well-established presence in the U.S.A.**, where it serves important customers in the industry marketplace.

Moreover, **SpagoBI 5.1** was released last week on OW2 Forge (forge.ow2.org). Its complete set of advanced data analysis tools includes **self-service** cockpits, **in-memory and mash-up** technologies, **what-if** analysis, **data mining**, **big data** analytics, and an innovative **social network analysis** tool that allows users to extract and analyze data from Social Networks (i.e. Twitter).

All information on the suite and on the two SpagoBI Demo Days & Workshops is available at www.spagobi.org, now hosting a completely renovated on-line demo of SpagoBI suite.

Engineering Group
Engineering Group is the leading Italian software and services company, with about 7,300 people and 40 offices in Italy, Belgium, Republic of Serbia, South America (Brazil and Argentina) and United States. www.eng.it

SpagoBI Labs
SpagoBI Labs are a working unit of Engineering Group's Technical, Innovation & Research Division that develops and manages the SpagoBI suite. Through its widespread presence in Italy, SpagoBI Labs coordinate four international offices located in Belgium (Brussels), in the USA (New York), and in Brazil (São Paulo), as well as a development laboratory in the Republic of Serbia (Belgrade). www.spagobi.org - www.spagoworld.org

The Triana Group
The Triana Group is a technology and business development services provider headquartered in New York, NY. Since 2008, it has connected growing technology companies with new strategic partners and key accounts nationwide and internationally. Its services span the entire strategic development cycle from the business planning stage to the operational deployment of new initiatives, leveraging innovative technologies and partnerships to build market channels and end-to-end localization projects. Some of its solutions include: SpagoBI business intelligence and big data toolsets; Qualiac ERP; Tennaxia environmental, health, and sustainability compliance and reporting software; and Ericsson's iconectiv messaging solutions. www.trianagroup.com
